# CSU – Base Unit

## Steam to Steam Generation

**maxi·  
therm™**  
beyond steam™

U.S. PATENT #7,093,566  
CAN. PATENT #2,488,000

---

### Features

- Vertical U-tube heat exchanger incorporating a preheater to preheat incoming water to saturation condition and a super heater to dry off the low-pressure steam
- Atmospheric steam condenser to preheat incoming liquid to a maximum of 212°F, resulting in 0% flash to atmosphere
- Steam-motivated pump set to return condensate to main condensate return line
- NEMA 4 control panel with an advanced programmable controller, graphic HMI display including BACnet, Lon, Modbus compatibility and remote access
- Blowdown package with blowdown tank
- Works on city, RO and DI water
